South Windsor, CT 06074

Re: Kennedy Road Cul-de-Sac
Resubdivision Application
Stormwater Management Statement

Dear Mr. Doolittle:

For information regarding stormwater management of the above-referenced application, please refer to the Stormwater Management Report for the 67 Kennedy Road Warehouse/Distribution Center site plan application.

The report contains results of the required calculations for stormwater attenuation, water quality measures, and pipe sizing for the storm drainage associated with proposed cul-de-sac at the end of Kennedy Road. The results indicate post-development flows will be less than pre-development flows for the 2, 10, 25, 50, and 100 year design storms, adequate water quality treatment is provided in the adjacent water quality basin, and the new pipes serving the cul-de-sac are sized to accommodate a 10 year design storm per standard engineering practices.

Please reach out if you have any questions.

Sincerely,
DESIGN PROFESSIONALS, INC.

Daniel H. Jameson, P.E.
Project Manager
