

## **Description of Coverage Maps:**

### **Title of Map: Current Radio Coverage of FD**

This map details the radio coverage for the fire department's analog uhf radio system. The FD currently is broadcasted from Box Mountain and the SWPD cell tower. This map shows in bright orange where in town a portable/handheld radio will work inside most buildings. The lighter orange area shows where the portable radio most likely not work inside a building.

### **Title of Map: Proposed Radio Coverage FD**

This map adds in the proposed VMP tower into the radio broadcasting system. The proposed broadcasting sites would be Box Mountain, SWPD, and VMP. As you can see this tower sustainably increases coverage in the southern end of town and the river valley area.
