Two reasons why sending equipment to outside truck wash is impractical, not workable and would never happen.

1) Cost -side of off site truck wash

The nearest truck wash is 35-40 miles from 06074

1 hr travel to 1 hr travel from and 1 hr wash -

3 hrs per unit @ 80.00 per hr.

24k plus \$6500 wash cost

\$30,500 per month \$366,000. per yr.

2) Labor side of off site truck wash

3 hrs to move 100 units per month @ 3 hrs per unit=300 hrs

driving trucks to truck wash would add 300 driver/tractor hrs per month

This operation would add 2 permanent full time positions -Not Workable / Not sustainable

Active chemicals used in mobile power washsystems for on site fleet washing

Sodium Hypochlorite

Potassium Hydroxide

Amonia
