

# MEMO

**DATE:** February 6, 2024  
**FROM:** Tony Manfre, Superintendent of Pollution Control  
**TO:** Water Pollution Control Authority  
**SUBJECT:** Clark Street Pump Station Force Main Valve Project  
**CC:**  
**# OF PAGES:** 1

The WPCA allocated a total of \$220,000 in American Rescue Plan Act (ARPA) funds to install a 16" buried force main valve, inground bypass valve, and 14" force main valve on the Clark Street Pump Station force main. This project is critical for pump station maintenance and will be vital for the forthcoming pump station rehabilitation. The project was completed on time and under budget with a remaining balance of \$19,253.16.

It is my recommendation to close out the project and transfer the remaining balance to the WPCA's last remaining open ARPA project, UV Disinfection Upgrade.
