ANNOUNCEMENT

Pleasant Valley Road Reconstruction Phase 2

The Town has hired Baltazar Contractors, Inc. to reconstruct Pleasant Valley Road from Long Hill Road to Clark Street. Tree trimming and removal is underway, and construction will begin in early to mid-April. The reconstruction includes new drainage structures and pipes, full depth reconstruction of the roadway with new base material, pavement, curbing, as well as concrete sidewalks. This work also includes repaving driveway aprons and restoration of disturbed roadside areas with topsoil and grass seed.

This work will proceed into the Fall, and Baltazar will complete as much work as possible before winter. There will also be utility work associated with this project, including Eversource, Frontier, and Cox Communications relocating utility poles and overhead lines to accommodate the road reconstruction.

There will be lane closures along Pleasant Valley Road due to construction work to install drainage and eventually grade and pave the roadway. There may be times when a temporary detour around the work area is needed. Residents within the project area will have access to their properties, and vital services will still be allowed to use the road with some delays. Motorists are advised to seek alternate routes around Pleasant Valley Road during this work.

Normal working hours for the contractors will be from 7:00 A.M. to 5:00 P.M. The Town appreciates your patience during this reconstruction project.

If you have any questions regarding this project, please call the Engineering Department at 860-644-2511 ext. 2344.
